

KOENIG & BAUER

Article management in offline mode

we're on it.

Article management in offline mode

Your **benefits** at a glance:

- competitive advantages due to the possibility of more precise costing already in the contract talk
- site-specific creation of decor programs
- simple data transfer
- no impairment on production during the creation of new decor programs

- with the article management in the offline mode you have the possibility to start the K15 WinVisu software on a separate PC
- decor programs can thus be prepared far from the production noise and the machine in a quiet environment
- the programs can be transferred to the machine via network or USB storage medium
- production and operation of the machine will not be affected during the creation of new decor programs
- for a more precise cost calculation, the maximum machine speed can be calculated and displayed on the basis of the article and print data

Characteristics

- the software update can be done via remote maintenance access with help of a stable internet connection
- software expansion
