

KOENIG & BAUER

Cone printing station

we're on it.

Cone printing station

Your **benefits** at a glance:

- the cone printing station allows the distortion free decorating of conical surfaces in highest print quality

- the cone printing station is specially developed for the distortion free decorating of conical surfaces
- beside this special function it can be used like a standard screen printing station
- it is suitable for a particularly wide range of article forms
- the prerequisite for retrofitting a cone printing unit is the equipment with tilting axes

Characteristics

- in addition to software expansion mechanical and electrical retrofits are required
- we recommend the retrofitting by one of our qualified service technicians
- this offers the advantage to directly train the machine operators in terms of functionality, configuration and operating principle
