**Special operating mode: Sampling**

we're on it.

# Special operating mode: Sampling

## Your **benefits** at a glance:

- fast and cost-effective
- No additional grippers or transfer nozzles required
- Article can be inserted manually in a selected station
- Input and output stations can be different but also identical

## Characteristics

- Software update necessary
- Use with identical stations only if opening / closing of the mounts is controlled pneumatically.  
For control with servo technology, article must be removed before outfeed
